

COMICCRAFT

Brainstorming and Ideation Phase

ComicCraft is an AI-based comic story creation project designed to help users generate creative comic stories and organize them into visually engaging comic scenes.

1. Problem Identification

Creating a complete comic manually can take a lot of time and requires skills in story writing, character creation, scene planning, and visual design. Beginners may also find it difficult to convert their ideas into a structured comic.

2. Brainstorming Ideas

Idea	Description
AI Story Generator	Generate a comic story from a user's simple prompt or idea.
Character Creation	Create and maintain characters based on the user's description.
Scene Generation	Convert story events into individual comic scenes or panels.
Dialogue Generation	Generate suitable dialogues for characters in each scene.
Comic Layout	Arrange scenes, characters, dialogues, and captions into comic panels.
Story Editing	Allow users to modify the generated story, characters, and dialogues.

3. Selected Concept

Selected Idea: AI-powered comic story creator. The system takes a user's story prompt and assists in producing characters, scenes, dialogues, and a comic-style output.

4. Target Users

- Students and beginners interested in creating comics.
- Writers who want to visualize their stories.
- Artists and content creators looking for quick story ideas.
- Users who want to experiment with AI-assisted storytelling.

5. Key Features Identified

- Prompt-based comic story generation.
- AI-assisted character and scene creation.
- Automatic dialogue and caption suggestions.
- Comic panel organization.
- Simple editing and regeneration options.
- User-friendly interface for creating and viewing comics.

6. Expected Outcome

The brainstorming and ideation phase results in a clear project concept: ComicCraft will provide an easy-to-use platform that helps users transform a simple idea into a structured and engaging AI-assisted comic story.

Conclusion: The ideation process helped identify the main problem, explore possible solutions, select the ComicCraft concept, and define its core features and users.
