

PROJECT DEVELOPMENT PHASE

Comic Craft

1. Development Overview

The development phase is the stage where the ideas prepared during project planning are turned into an actual comic. In this phase, the story, characters, dialogues, illustrations, panels, and page layout are created and combined.

2. Development Activities

Activity	Development Work
Story Development	Write the complete story with a clear beginning, middle, and ending.
Character Design	Create the appearance, personality, and role of each character.
Dialogue Creation	Write short and meaningful dialogues for each scene.
Panel Creation	Divide each page into suitable comic panels.
Drawing & Illustration	Draw the characters, backgrounds, objects, and scenes.
Colouring	Add suitable colours to make the comic attractive and clear.
Page Layout	Arrange drawings, dialogues, captions, and speech bubbles properly.
Editing	Check spelling, drawings, sequence, and overall presentation.

3. Tools and Materials

- Drawing sheets or digital drawing software
- Pencils, eraser, ruler and sketch pens
- Colour pencils or digital colours
- Computer or mobile phone (for digital work)
- Comic-making or graphic design software, if required

4. Testing and Review

After creating the comic, each page is reviewed to make sure the story sequence is correct, the dialogues are readable, the drawings are clear, and there are no major spelling or design errors.

5. Expected Output

The development phase produces a complete comic with finished characters, illustrations, dialogues, panels, colours, and page layouts.

6. Conclusion

The project development phase converts the planned ideas into the final comic. Careful development and review help create a clear, creative, and attractive Comic Craft project.
