

■■ Comic Craft: User Empathy Map (PDS)

Understanding user experiences by translating core emotional tracking variables directly into standard graphic layouts.

1. Comic Panel Quadrants

Dialogue Balloons (Says) • 'I just want this to happen invisibly.' • 'It takes too long to change panels.'	Thought Clouds (Thinks) • <i>Am I spending too much time tracking stuff?</i> • <i>There must be a more fluid layout.</i>
Action Panels (Does) • Jumps between custom outside trackers. • Tries to retroactively guess metrics later.	Emotional Textures (Feels) • Anxious: Afraid of dropped metrics. • Annoyed: Distracted from main tasks.

2. Narrative Breakdown: Pains & Gains

- **Structural Pains:** Fragmented story flows, complex manual tracking steps, and workflow fatigue.
- **Intended Gains:** Fluid automated tracking and clean visual layouts that clear administrative blocks.
