

Comic Craft: Solution Requirements Specification

The Production Script: Product Rules & Specs

This document sets out the product performance boundaries and execution benchmarks that engineering must respect.

Act I: Functional Requirements (The Core Plot)

- **FR-101:** System must support federated single-sign-on (SSO) authentication parameters.
- **FR-102:** Interface canvas must provide interactive live-saving multi-state canvas components.

Act II: Non-Functional Requirements (The Visual Style & Speed)

- **NFR-201:** Operational endpoints must acknowledge service operations inside a 200ms latency ceiling.
- **NFR-202:** Client web interfaces must support reactive sizing structures down to 320px mobile viewport dimensions.

Act III: Acceptance Criteria (The Editorial Review)

- **AC-301:** Verified automated test coverage must exceed an 85% block deployment threshold.
- **AC-302:** Zero critical vulnerability flags must appear during container image security sweeps.
