

Comic Craft: Solution Architecture Blueprint

The Blueprint: Structural Layers of the Citadel

A highly scalable blueprint organizing system layers into functional production units.

Layer 1: The Presentation Frame (Frontend)

- Implements React frameworks with responsive layouts to present state updates in real-time.

Layer 2: The Logic Engine (Backend API Core)

- Scalable infrastructure coordinating application logic, security protocols, and third-party data connections.

Layer 3: The Secure Vault (Persistence Layer)

- Highly optimized database architecture ensuring absolute consistency and security of all relational metadata.
