

COMMUNICATION FRAMEWORK

THE COMIC CRAFT FRAMEWORK // PRODUCTION SCRIPT

PANEL I: THE TRANSMISSION NETWORK (OVERVIEW)

This document establishes the strategic **Communication Grid** for cross-functional alignment. In Comic Craft terms, this acts as the *Editorial Pipeline* ensuring writers, pencilers, and inkers talk seamlessly without breaking the narrative flow.

PANEL II: DIALOGUE BALLOONS (CHANNELS & FREQUENCY)

- **Daily Standups (The Quick Sketch):** 15-minute sync-up focusing on yesterday's lines, today's inks, and any immediate creative blockers.
- **Sprint Review (The Page Proofs):** Bi-weekly core presentation demonstrating completed epic panels to stakeholders for sign-off.
- **Slack & Async Channels (The Editorial Desk):** Ongoing real-time coordination grouped strictly by production features to avoid communication noise.

PANEL III: THE CAPTION BOXES (REPORTING ARCHITECTURE)

- **Status Reports:** Compiled into high-level monthly summaries tracking budget burn and feature delivery timelines.
- **Risk Logs:** Escalations flagged instantly with high-contrast visual signifiers (Comic Red Alerts) when core system parameters are threatened.
