

PROJECT DEMO PLANNING

THE COMIC CRAFT FRAMEWORK // PRODUCTION SCRIPT

PANEL I: THE DRESS REHEARSAL (RUNBOOK)

A meticulous structural staging plan designed to minimize deployment vulnerabilities during the critical showcase milestone. This plan orchestrates roles, timing, and fallback infrastructure scripts.

PANEL II: THE LIVE SHOW TIMELINE (SCENE BY SCENE)

- **T-Minus 2 Hours (The Stage Setup):** Final functional check in isolated staging environment. Seed historical mock-data framework.
- **Minutes 00-05 (The Prologue):** Frame the user context, state the baseline problem statement, and outline the demo itinerary.
- **Minutes 05-20 (The Main Feature):** Execute real-time user flow walkthrough. No pre-recorded fallback vectors unless critical system failure occurs.
- **Minutes 20-30 (The Q&A; / Panel Discussion):** Open floor to stakeholders for editorial reviews, capturing product feedback directly.

PANEL III: DEFENSIVE INK (CONTINGENCY SCRIPTS)

If the staging node database falls over mid-demonstration, the presenter immediately switches to an active secondary mirror layout pre-seeded with fallback mock assets.
